We are a physically fit couple in our mid-late 50's with no work restrictions. We are full-time RVers, members of Escapees RV Club, non-smokers, non-drinkers. As employees we are self-starter's, very service-oriented, detailed, and experienced in dealing with customers and other employees. We are both easy-going, get along well with others and have a strong work ethic. We have never left an assignment early. We enjoy windsurfing, horseback riding, hiking, mountain biking and roller blading.

Jack: Experienced in all aspects of residential electrical, plumbing, general carpentry, maintenance and grounds keeping. Can operate most farm equipment and is an experienced skid loader operator. Highly skilled in most computer-related areas (PC's). Excellent Excel, Word and Access database skills. Also experienced in the design and installation of campground WiFi systems (wireless internet).

Danielle: Experienced in all aspects of office work including management and employee supervision. Excellent reservation program skills – expert in CampgroundMaster; average Microsoft Word skills.

We are both experienced riders, having owned a variety of horses most of our lives. For two summers we worked at a Coast to Coast Campground/Ranch in Georgia. Danielle worked as a wrangler - leading trail rides, all aspects of horse care and general ranch work. Jack did maintenance and grounds keeping, electrical trouble-shooting and repair, plumbing, equipment maintenance, pool maintenance and welding. Jack was the lead electrician for a 5000+ person Bluegrass Festival in 2002 (2 stages, plus vendors' row). In addition, in 2003 Jack performed all aspects of stable maintenance, extensive fence building/repair, horse care and part-time wrangler.

The summer of 2004 we worked at a commercial campground in Idaho. Danielle worked in the office doing computerized reservations (CampgroundMaster) and retail store duties (cash register, credit card machine, stocking shelves). Jack performed all aspects of campground maintenance and grounds keeping, including electrical, plumbing, skid loader operation, concrete work, etc. Jack also worked in the store doing computerized reservations on an as-needed basis.

The summers of 2006 and 2007 we worked in a commercial campground in Colorado. Duties were similar to the above. Danielle again worked in the office, with CampgroundMaster computerized reservations, POS and credit card machines. Jack performed all aspects of campground maintenance. In addition, Jack designed and installed a campground-wide WiFi system, providing wireless internet to all sites. This consisted of six Access Points, and corresponding hardware.

March and April of 2007 and 2008 we were Campground Hosts at Arches National Park. Duties included fee compliance, visitor contact/education, campground rules enforcement, firewood sales, etc.

Our 5th wheel is a 2001 38' Royals International (13' 3" tall), pulled by a 25' 1999 Volvo heavy duty truck. In addition to the truck and trailer, we travel with a Jeep Wrangler that we "double tow". We have a 35-pound female dog (Australian Shepherd) that is obedience trained, gets along well with other dogs, and was formerly a resident campground dog, so she is very "campground friendly". Better pictures of us, our RV and our dog can be seen on our website: <http://www.jackdanmayer.com>.
